

Top 4 Internet Safety Rules

1. Using the Password-Free Wireless Network

Connecting to unprotected wireless networks is a dangerous act. Keep using your mobile network if you will use your sensitive data.

2. Using Secure Websites

Visit websites with green padlocks and HTTPS certificates.

3. Privacy on Social Media

Keep your social media accounts private. Criminals can collect information about your public profile.

4. Online Shopping

Do not use your credit card information on unknown and unreliable shopping websites.
